Crossword Solution

Healthy Meal Planning

It's no secret that planning and enjoying healthy meals ensures a balanced diet and reduces the risk of developing diseases, including high blood pressure, diabetes and heart conditions. But what many people don't know is how easy it is to plan healthy meals. Here are simple tips to get you started.

- Keep the six food groups in the mix: Dairy, fruits, grains, oils/solid fats, protein and vegetables
- Make a shopping list and include fresh, frozen and staple items to have readily available
- Try our Chickpea recipe on the back page. Reduce sodium intake by seasoning food with herbs or citrus
- Plan to use leftovers to save time and money
- Write down your meals to ensure you have a variety of healthy foods

Most of all, drink plenty of water throughout the day. It is very important to stay hydrated.

Check Out the Rewards of an Annual Wellness Visit

The Annual Wellness Visit (AWV) is a yearly appointment with your primary care provider to create or update a personalized prevention plan. This can help prevent illness based on your current health and risk factors. Seeing your doctor for a wellness visit also helps correct unhealthy habits, manage chronic conditions, and puts you on a path to a healthier lifestyle. A visit with your doctor also provides an opportunity for you to be the best advocate for your health care needs. Come prepared with questions to ask your doctor. Share any symptoms you may have. Discuss future prevention measures as well.

As a valued ATRIO Health Plan member, another benefit just for you: our Healthy Rewards program! Through the program, members are eligible to receive one \$50 reward annually for completing their AWV, in-home-assessment, or annual physical. Learn more at www.atrionhp.com.
