

Clinical Practice Guideline – Preferred Formulary Drugs

Heart Failure Clinical Practice Guidelines

	Angiotensin Receptor-Nepriylsin Inhibitor (ARNI)	ACE Inhibitors / Angiotensin Receptor Blockers (ACEi/ARBs)	Mineralocorticoid Receptor Antagonists (MRA)	Sodium-Glucose Transporter-2 Inhibitor (SGLT2i)	Beta Blockers
Tier 1	-----	-----	Spironolactone	-----	Carvedilol, Metoprolol Succ/Tar
Tier 2	-----	Enalapril (oral solution)	Eplerenone	-----	Bisoprolol
Tier 3	Entresto (Sacubitril/Valsartan)	Edarbi (Azilsartan)	-----	Farxiga (Dapagliflozin), Jardiance (Empagliflozin)	-----
Tier 4	-----	Eprosartan	-----	-----	-----
Tier 5	-----	Qbrelis (Lisinopril)	-----	-----	-----
Tier 6	-----	Irbesartan, Valsartan, Olmesartan, Losartan, Benazepril, Enalapril, Fosinopril, Lisinopril, Perindopril erbumine, Quinapril, Ramipril, Trandolapril, telmisartan, captopril, moexipril, candesartan	-----	-----	-----

COPD Clinical Practice Guidelines

	Short acting Muscarinic Antagonist (SAMA)	Long acting Muscarinic Antagonist (LAMA)	Short acting Beta Agonist (SABA)	Long acting Beta Agonist (LABA)	Inhaled Corticosteroids (ICS)	LABA + ICS	LABA (or SABA) + LAMA (or SAMA)	LAMA + LABA + ICS
Tier 1	-----	-----	-----	-----	-----	-----	-----	-----
Tier 2	Ipratropium	-----	Albuterol HFA	-----	-----	Advair Diskus (Fluticasone/Salmeterol)	-----	-----
Tier 3	-----	Spiriva (Tiotropium)	Terbutaline (tablet)	Serevent (Salmeterol), Striverdi (Olodaterol)	Arnuity Ellipta (Fluticasone), Budesonide, Flovent (Fluticasone)	Advair HFA (Fluticasone/Salmeterol), Breo Ellipta (Fluticasone/Vilanterol), Symbicort (Budesonide/Formoterol)	Anoro Ellipta (Umeclidinium/Vilanterol, Combivent (Ipratropium/Albuterol), Stiolto (Tiotropium/Olodaterol)	Breztri (Budesonide/Glycopyrrolate/Formoterol), Trelegy Ellipta (Fluticasone/Umeclidinium/Vilanterol)
Tier 4	Atrovent (ipratropium)	-----	ProAir (Albuterol)	-----	-----	-----	-----	-----
Tier 5	-----	-----	Terbutaline (SQ solution)	-----	-----	-----	-----	-----
Tier 6	-----	-----	-----	-----	-----	-----	-----	-----

***Theophylline is a methylxanthine that is less commonly used than the above agents, but it is Tier 4 on the formulary**

Diabetes Clinical Practice Guidelines

	Glucagon-like Peptide 1 Receptor Agonist (GLP-1)	Sodium-Glucose Transporter-2 Inhibitor (SGLT2i)	Thiazolidinediones (TZD)	Dipeptidyl-peptidase 4 Inhibitor (DPP-4)	Sulfonylureas	Insulin	Combo Products
Tier 1	-----	-----	-----	-----	-----	-----	-----
Tier 2	-----	-----	-----	-----	-----	-----	-----
Tier 3	Ozempic (semaglutide), Rybelsus (semaglutide), Trulicity (dulaglutide), Victoza (liraglutide), Mounjaro (tirzepatide; dual GLP-1/GIP agonist)	Farxiga (dapagliflozin), Jardiance (empagliflozin)	-----	Tradjenta (linagliptan)	-----	Soliqua (glargine/lixisenatide), Xultophy (degludec/liraglutide)	Glyxambi (empagliflozin/linagliptan), Jentadueto (linagliptan/metformin), Synjardy (empagliflozin/metformin), Trijardy (empagliflozin/linagliptan/metformin), Xigduo (dapagliflozin/metformin)
Tier 4	-----	-----	-----	-----	-----	-----	-----
Tier 5	-----	-----	-----	-----	-----	-----	-----
Tier 6	-----	-----	Pioglitazone	-----	Glimepiride, Glipizide, Glyburide,	Fiasp (aspart), Humulin R, Semglee (glargine), Novolin (N, R, 70-30), Novolog (aspart), Toujeo (glargine)	-----

***Metformin is first line for all diabetes patients and is Tier 6 on the formulary**

Osteoporosis Clinical Practice Guidelines

	Bisphosphonate	Monoclonal Antibody	Selective Estrogen Receptor Modulator (SERM)	Parathyroid Hormone-related Protein Analog
Tier 1	Alendronate	-----	-----	-----
Tier 2	Ibandronate (tablet, IV), pamidronate (solution), risedronate (35 mg or 150 mg tabs)	-----	Raloxifene	-----
Tier 3	Alendronate (solution), Reclast	Prolia	-----	Tymlos, Forteo
Tier 4	Ibandronate (solution), risedronate (5 mg or 30 mg tabs, or 35 mg delayed release), Zoledronic acid	-----	-----	-----
Tier 5	-----	Xgeva, Evenity	-----	-----
Tier 6	-----	-----	-----	-----
