

Physical & Mental Health Integration and Coordination

Mid-Valley Behavioral Care Network
administers mental health and
chemical dependency services on behalf of
Willamette Valley Community Health
Coordinated Care Organization
(WVCH CCO)

Primary

Behavioral Health in Primary Care (PCBH); Mental Health and Substance Use Services Provided in Primary Care

Secondary

Primary Care directly refers patients to services or patient initiates care—no referral needed

Some patients need mental health and/or alcohol & drug treatment services beyond that which can be offered in the primary care setting. Specialty mental health and substance abuse treatment programs in the community provide a continuum of services that address mental health, addiction and recovery issues for children, adolescents and adults.

‡ = Detox from benzodiazepines is provided only by Providence Portland Hospital, 503-574-9200. For assistance in ensuring WVCH coverage, contact WVP 503-587-5123

Tertiary

Some people have such serious mental health problems they require inpatient care. Examples of patients who would require this level of care are those with psychotic disorders who have voices telling them to harm others and they are at risk for doing so, patients with life-threatening withdrawal symptoms, patients who are at imminent risk for self-harm, etc.

Requires pre-authorization

Obtaining Pre-authorization
Screening for inpatient and diversion services is done by crisis teams in each county. They can also authorize hospital diversion services and provide short term interventions and linkage to outpatient and community services.

▲ Marion County Psychiatric Crisis Center 503-585-4949

▲ Polk County Behavioral Health 503-623-9289
After hours calls go through NWHHS 503-581-5535

Screening is also available at hospital emergency rooms.
Children's psychiatric residential care is provided based on recommendations from MV-WRAP teams (see providers listed above).
