

What Oncology Services Are Included?

A simple overview of the services represented in the proposed CPT/HCPCS code list.

How to read this page

The code list includes care for blood disorders and cancer, plus radiation treatment. The examples below describe the major types of services. A claim still must meet all requirements

438	115	553
Hematology / medical oncology codes	Radiation oncology codes	Total mapped codes

How to Read This Guide

The source list groups billed CPT/HCPCS codes into Radiation, E&M, Other professional services, Chemo Infusion Services, and Drugs. A mapped code shows the type of oncology service represented, but the claim must also meet every requirement below.

Claim requirement	What it means for a non-specialist
Diagnosis must be in the master list	The claim must include at least one diagnosis found in the TOI diagnosis master list.
Place of service must be 21	Claims with place-of-service code 21 (inpatient hospital) are excluded.
Procedure must be E&M or infusion	E&M claims require specialty 82 Hematology, 83 Hematology/Oncology, 90 Medical Oncology, or 98 Gynecologic Oncology.
Code must be mapped	The billed CPT/HCPCS code must appear in the mapping and match the relevant claim type, including Radiation where applicable.

Hematology & Medical Oncology

Service area	What is covered	Common examples
Visits and care management	Office visits, consultations, follow-ups, virtual or telephone care, treatment planning, care coordination, and end-of-life discussions.	New or established patient visits; prolonged visits; digital check-ins; cancer treatment-plan updates
Blood tests and procedures	Services used to collect blood, monitor blood counts, or evaluate blood and bone marrow.	Blood draws; complete blood count; bone marrow aspiration or biopsy; therapeutic phlebotomy
Chemotherapy administration	The work involved in giving cancer treatment by injection, IV push, infusion, pump, or other specialized route.	Chemotherapy infusion; IV push; injections; prolonged pump infusion
Other infusions and injections	Hydration and non-chemotherapy treatments delivered through an IV, injection, or on-body device.	IV fluids; therapeutic infusion; intramuscular or subcutaneous injection; on-body injector
Ports and pumps	Care and maintenance for devices used to deliver medications.	Port flushing; pump refill; reservoir maintenance; drug-delivery device irrigation
Cancer-treatment drugs	Medicines that directly treat cancer or certain blood disorders.	Chemotherapy; immunotherapy; targeted therapy; hormonal therapy; biologic drugs
Blood and immune support	Medicines that support blood-cell production, platelets, or immune function.	Epoetin; filgrastim; pegfilgrastim; immune globulin; romiplostim
Supportive medicines and fluids	Medicines and fluids that prevent or manage treatment side effects and complications.	Nausea medicines; steroids; antihistamines; antibiotics; pain medicines; saline; electrolytes; iron
Bone and hormone treatment	Medicines used for bone protection, bone involvement from cancer, or hormone-sensitive cancers.	Denosumab; zoledronic acid; leuprolide; goserelin; fulvestrant

Radiation Oncology

Service area	What is covered	Common examples
Planning and simulation	Preparing the radiation treatment plan, locating the treatment area, and accounting for movement such as breathing.	CT guidance; treatment-field setup; 3-D planning; IMRT planning
Dose calculation and safety	Calculating and checking the radiation dose and designing equipment that shapes or directs the beam.	Dose planning; dosimetry; medical physics review; beam-shaping devices
External-beam radiation	Delivering radiation from a machine outside the body.	Standard radiation treatment; intensity-modulated radiation therapy (IMRT)
Image guidance	Using imaging and positioning tools to accurately aim treatment.	Treatment imaging; stereoscopic X-ray guidance; ultrasound guidance
Stereotactic treatment	Delivering highly focused radiation to a small, precisely defined area.	Stereotactic radiosurgery (SRS); stereotactic body radiation therapy (SBRT)
Specialized radiation	Radiation using specialized technology or delivery during surgery.	Proton therapy; neutron therapy; intraoperative radiation
Brachytherapy	Placing radioactive material inside, near, or on the area being treated.	High-dose-rate or low-dose-rate treatment; intracavitary, interstitial, or surface treatment
Hyperthermia	Using controlled heat as part of cancer treatment, often with radiation.	Regional or localized heat treatment
Treatment oversight	Physician and physics review during a course of radiation treatment.	Treatment management; special treatment review; radiation physics consultation

Important to know

Claims are excluded when the service occurred in an inpatient hospital (POS 21).
Office-visit claims require an approved specialty: Hematology, Hematology/Oncology, Medical Oncology, or Gynecologic Oncology.
The full list contains 553 codes: 438 for hematology/medical oncology services and 115 for radiation oncology services.
See the CPT_HCPCS_Code_Mapping_TOI tab for every code and the Proposed Logic Notes tab for the complete inclusion rules.

Starling and Atrio may add or remove codes from the list. We will review proposed changes and provide feedback.
